Scan Prints

Using calibrated high-resolution scanners, we optimize each image as we scan, and then apply minor color and exposure corrections as needed. The resulting image files will produce high quality prints, and can also be imported into your computer for graphic design applications, websites, e-mailing, etc. If you request a CD of the scanned photographs, the images are saved as highest quality JPEG files in RGB Color Mode unless otherwise noted. The scan charges are in addition to the cost of any *Reprints* or *Enlargements* (see left column). See our *Shoobox Scanning* brochure for scanning large quantities of photos.

Add \$4.99 Setup & CD Recording charge per CD requested. Many image files can be recorded onto one CD.

Scan 35mm Negatives to CD

Service Time: 4 Lab Days (7 Lab Days for 250+ scans)

Negatives are scanned on an industrial film scanner incorporating "Digital ICE" Dust and Scratch removal. **Slides** (see next column for pricing) are cleaned with compressed air & scanned at high resolution. While scanning both negatives and slides, our qualified technicians optimize the color and exposure of each image. So these image files will produce high quality prints, and can also be imported into your computer for graphic design applications, e-mailing, websites, etc. Scans are saved as high quality JPEG files unless otherwise noted.

NEGATIVES must be submitted in strips of at least 3 inches long, or at least 2 images per strip. Add \$.99 each for any 35mm negatives that do not meet these criteria.
